

Why should I sign the CCC Patient Authorization form?

PATIENT BENEFITS OF AUTHORIZING THE SHARING OF HEALTH RECORD INFORMATION AMONG WAKE COUNTY PROVIDERS OF HEALTH CARE FOR THE UNINSURED

1. More coordinated care and more effective treatments (doctors have a better picture of what your health problems are).
2. You won't have to provide the same information and tell the same facts over and over – saving you time at each visit.
3. It reduces unnecessary testing.
4. It can reduce problems with medications, because knowing the medications you are on is critical to preventing possible adverse reactions from combining drugs.
5. It can get you access to free medications, because your information can populate the Prescription Assistance Program (PAP) system.
6. You may receive referrals to other providers for ongoing care.
7. It will help us determine whether you or your family members may qualify for Medicaid.
8. It reduces the amount of paperwork needed to apply for services, and you won't need to provide basic information at every site you visit.
9. It helps us better serve you.
